

Glass boards

Calypso is a magnetic glass board made in Sweden. The hardened glass is 4mm thick, it has bevelled edges and a concealed mounting. The standard colours are opal white and black, but you can have it in any other colour of your choice. The water based colours are enamelled on to the glass for top quality.

Cosmo White and Black have a white versus a black reverse side and clear edges. The colours are enamelled on to the glass for top quality.

Cosmo is an elegant glass board made in Sweden of high quality, 6mm hardened glass. The board has design details such as bevelled edges and fittings made of aluminium. Cosmo in optical white has an acid finish on the reverse side.
